

PrismHR Custom Domain

Connect PrismHR Self Service to Your Domain

PrismHR Custom Domain provides your clients and their employees access to the self-service portals via your own domain or subdomain. Keep the branding of your services consistent and make it easier for employees and managers to remember where to access self service.

How to Get Your Custom Domain

PrismHR will purchase and manage the SSL certificates for both the manager and employee self-service portals for you. That way you don't have to worry about certificates expiring and customers losing access to the system.

To get your custom domain, visit PrismHR.com/domain and complete the additional product request form. Select Custom Domain and fill in all of the necessary information. Our operations team will contact you to complete the setup process.

Pricing

PrismHR Managed SSL Certificates \$2,500 for the first year, then \$500 each year after.
(Includes purchase of 2 SSL certificates)

Please note that you must own the rights to the domain you want connected with PrismHR.
